

AI COMPLIANCE OS, WHEREVER YOU ARE

Compliance, *in your pocket.*

The statutory clocks, tasks, registers and documents of your EU AI Act Info platform, always with you. The same data, the same rules, and nothing typed twice.

NIS2 early warning within 24 h
the countdown starts at detection

Alert the supplier
in one tap, from the incident detail

Playbooks in your language
in the language of your phone

TODAY

Your day

Clocks and overdue tasks.

PROVE

The proof

Obligations, evidence, templates and audit.

TWIN

Digital twin

Incidents, AI, suppliers, assets, risks.

OVERVIEW

At a glance

Score and gaps by regulation.

MORE

Everything else

Trust center, team and organisation.

The whole platform, *away from* your desk.

A native app, not a shrunken web page: every module of the platform, on the same data and with the same roles as the rest of your team.

Statutory clocks, live

Record an incident and see every NIS2, DORA, GDPR and CRA deadline at once, with the article that sets it. Then mark each submission as made.

TODAY · INCIDENTS

The supplier, alerted in one tap

When an incident involves a supplier, the app prepares the summary, sends it to their security contact and keeps the date on record.

TWIN · INCIDENTS

The AI register, in seconds

ChatGPT, Copilot, Gemini: add the tools your team uses with a single tap. The provider joins the supplier register on its own.

TWIN · AI REGISTER

Document check

Upload a policy from your phone: it is read clause by clause against what the law requires, and you get the fixes to make.

PROVE · DOCUMENT CHECK

Templates and playbooks

For every obligation, the steps to follow and Word drafts with your company name and dates already filled in, in your phone's language.

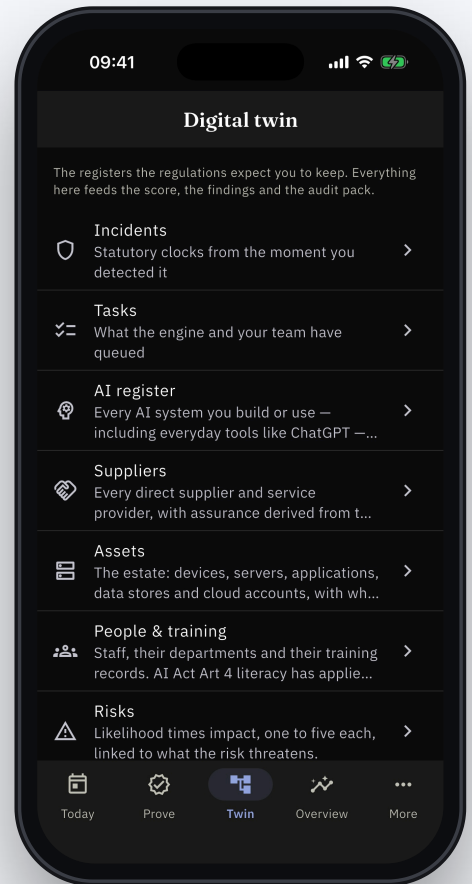

PROVE · TEMPLATES

Overview and audit pack

The severity-weighted score, where the gaps lie in each regulation, and the audit PDF to share with whoever asks for it.

OVERVIEW · PROVE

The digital twin: the registers the regulations expect you to keep, in one tab.

One account

The same sign-in and the same roles as the web platform.

The same data

What you do on your phone is already on the web, and the other way round.

The same rules

Verdicts computed by the engine, never by a language model.

AVAILABILITY

For iPhone and Android, *alongside the platform.*

For companies that use EU AI Act Info: sign in with your company account, and colleagues are invited by your own team. Would you like to see it live? Ask us for a walkthrough.
